Education

Shahid Beheshti University

BSc in Cell and Molecular Biology

GPA: 18.25/20

Relevant Coursework: Biochemistry I & II; Molecular Biology of Prokaryotes; Molecular Genetics; Microbiology; Biostatistics and Computer.

Tehran, Iran

Expected graduation: June 2027

Research Interests

Metabolic engineering; synthetic biology; natural product biosynthesis; enzymology; analytical chemistry; drug discovery. Broader goal: developing sustainable, cost-effective biosynthetic pathways for the pharmaceutical and food industries to improve product accessibility and quality.

Laboratory Training Experience

Molecular Genetics Trainee (Paid Training Course)

Sensome Institute, Shahid Beheshti University of Medical Sciences

Tehran, Iran

Duration: 6–7 months

- Performed DNA extraction and various PCR techniques.
- Prepared buffers and reagents; performed accurate pipetting under sterile conditions.
- Conducted gel electrophoresis to analyze nucleic acid products.
- Handled mice and collected blood samples following standard laboratory protocols.
- Applied microscopy, staining, bacterial culture, and cell culture techniques.

Skills

Molecular: DNA/RNA extraction, PCR (multiple types), gel electrophoresis, buffer preparation, pipetting, sterile technique.

Cell/Microbiology: Bacterial culture, cell culture, microscopy, staining.

Animal: Mouse handling, blood collection.

Computational: Python (basic), biostatistics, Microsoft Office.

Languages: Persian (Native); English (Advanced; Duolingo English Test: 120–130).

Leadership & Activities

Temporary Head

Primer (Genetics Journal), Shahid Beheshti University

Tehran, Iran

- Coordinated editorial tasks and contributed to journal planning.

LinkedIn Manager

Tehran, Iran

Plant, Algae, and Environment

- Managed LinkedIn content and engagement.

Availability

20 hours per week; minimum commitment of 1.5 years; available in person in Tehran; open to volunteer, for-credit, or paid positions.
